PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Response to Arguments

Applicant's arguments filed 1/22/2008 have been fully considered but they are not persuasive.

Applicant's position lies in the argument that a product of a regulated voltage and an unregulated current is a power that is not regulated.

In response, the regulation of voltage regulates a component of power. If the voltage is controlled or regulated the power is in turn controlled and regulated. Regulated power is not limited to the product of regulated current and regulated voltage. Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

It is suggested Applicant amend at least the independent claims to recite "only a regulated current" or "a regulated power of a regulated current and a regulated voltage"

In view of the above the rejection is proper and is therefore maintained.

/Michael J Sherry/
